

# corey pejza

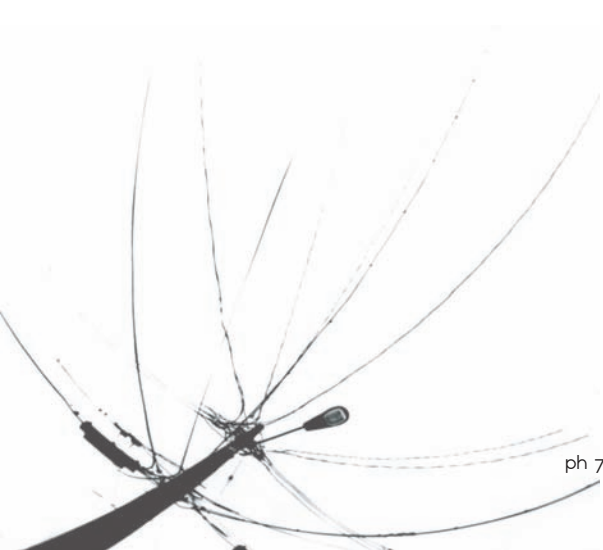

art • design • dj

June 2011

I am interested in graphic design and all other associated areas of design, and the design process. This includes, but is not limited to, print design, web design, flash design, production design, digital imaging, typography, advertising, and marketing. Communication is my passion and mode of inspiration. Out of all the different ways to be creative I think my most enjoyable way is visually. Communication affects us in so many ways and this is why my passion for it is so great.

I enjoy being productive and constantly push to achieve my goals. Through previous opportunities I was able to help in my past positions to contribute to a productive company growth, quick turn around, and availability of diverse services offered.

My interest lies in working in the business-communication field. I would be a great asset to an employer who is looking for someone that can take an idea and put it to reality.
